SUMMARY

Computer Science graduate with practical experience building full-stack applications using React, Node.js, Express.js, and SQL/NoSQL databases. Skilled in developing REST APIs, implementing authentication, designing data models, and integrating frontend and backend services. Strong fundamentals in DSA, DBMS, and OOP, with additional experience using Python and FastAPI for API development.

SKILLS

Languages: Python, JavaScript (ES6+), TypeScript, SQL, C++

Backend & APIs: Node.js, Express, REST API design & testing, JSON

Databases: SQLite/MySQL, MongoDB

Frontend: React, HTML5, CSS3, D3.js

Core CS: Data Structures & Algorithms, DBMS, Object-Oriented Programming, Operating Systems

Tools & Practices: Git/GitHub, VS Code

PROJECTS

AI Wound Analysis | *github.com/TrimergeLabs/AiWoundAnalysisProj*

- Built the backend data layer for an AI-assisted diagnostic application implemented authentication, authorization, and MongoDB-based storage for secure, user-scoped management of application data.
- Designed the data flow and API contracts between AI inference services and the application layer, validating and synchronizing diagnostic results across integrated services.
- Used JSON as the primary interchange format across services and implemented validation logic to enforce data consistency and integrity end-to-end.
- Designed user-specific access control logic so diagnostic results remain securely scoped to authenticated users only.

Money Muling Detection | *github.com/GauravKumarGope/MoneyMulingAI*

- Built a REST API-driven transaction analysis system with Python and FastAPI to process large-scale financial transaction datasets.
- Parsed and validated CSV datasets of thousands of transaction records, modeling transaction relationships as graph structures and applying business rules to flag inconsistencies.
- Applied DFS-based graph traversal algorithms to detect suspicious transaction chains, analyzing patterns to identify root causes of anomalies.
- Generated structured PDF reports summarizing detected anomalies, turning raw analysis output into a readable, decision-ready deliverable.

EDUCATION

University of Mysore (School of Engineering) — 2022 – 2026
Bachelor of Engineering in Computer Science and Design
CGPA: 8.2
